OFFENDER RECEIVES FINE

YOU RECEIVE £10 BACK

SOLVE UNAUTHORISED PARKING INSTANTLY

FlashPark

FLASHPARK is a completely new way to meet the changing demands of parking enforcement on private land. It is an online simple-to-use way for you to solve your unauthorised parking problems with the added convenience of being operated 24 hours a day for any private car parking area in the UK.

How does it work ?

You create a legally enforced controlled parking zone around the area you wish to protect and issue on the spot fines to offending vehicles. We can help you do this.

What you need to do ?

Simply create an account online. Then you can order your warning signs that should to be displayed at prominent locations around the controlled zone. The signs can be customized to suit your circumstances and parking regulations. As soon as the signs are displayed you can begin to issue tickets.

How do I issue tickets ?

Take a picture of the vehicle in its offending position. Upload it to our web site. Enter the registration. We search the registration for you to check the make and model. That's it. We will then issue the ticket by post to the vehicles owner, and pursue any outstanding collections via an approved credit control agency.

Will it solve my parking problem ?

Our experience is that the signs act as an excellent deterrent. If vehicles continue to park illegally use our website and we will issue tickets and enforce payment. This will deter any persistent offenders.

Why is this unique ?

Every ticket is backed up with a photo and a map of where the offence took place. This strong evidence is vital in our enforcement procedure and reduces appeals. There is no reference to you the client on the signs or penalty charge notice posted to offending drivers. The service is free of charge as our fees are payable from offending motorist fines.
